HOW TO
FIND YOUR CORRECT
TIDY TRAX SIZE

Measuring Method

Step 1

Get the pair of shoes you will most likely be wearing while using Tidy Trax.

Step 2

Using a tape measure, yard stick, or ruler, measure the length of the bottom (sole) of the shoe from heel to toe.

Step 3

Take that length measurement and compare it to the size chart below.

-Look to see what Tidy Trax size letter best matches your shoe length measurement.

Scenario 1:

If your shoe measures **11^{9/16}** inches in length...
Your Tidy Trax size would be **G**

Scenario 2:

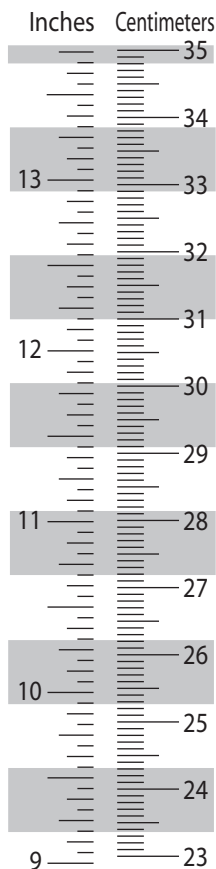

What if your shoe length measurement falls exactly on the line between 2 Tidy Trax sizes?

What if your measurement is: **11^{7/16}** inches?

That could be either a size **F** or size **G**

In a situation like this, we recommend that you choose the larger of the two sizes.
